

ANNA SEBEDACH

BUSINESS & AI — STRATEGY-MINDED IT STUDENT

Final-year Business & IT student (ITBBA, Haaga-Helia, graduating December 2026) combining business analysis with hands-on AI. I have shipped AI systems end to end, including a customer-service agent in production use, voice assistants and workflow automations, and most recently an AI-assisted sales-proposal workflow at Coventures with criteria-driven analysis and selection of client reference cases. Lately I have focused on data and analytics, including a Power BI dashboard that scores Finnish industries on their AI and 5G readiness. Available from August 2026 (part-time to full-time).

WORK EXPERIENCE

AI Workflow Developer (pilot project)

June 2026 →

Coventures — venture building & consulting, Helsinki

- Turned a consultancy's sales-proposal process into a repeatable AI-assisted workflow, including criteria-driven analysis and selection of 38 client reference cases and 43 expert profiles used in live proposals.
- Built and tested the supporting system (Claude Code + Claude Design): client-conversation transcript → structured outline → design handoff → finished deck, distilled from past proposals.
- Documented the system so new users can run it without insider knowledge — turning the founders' tacit selection criteria into an explicit, prioritized decision framework.

Content/Brand Manager & Dance Instructor (Freelance)

2022 →

Multiple organizations incl. City of Helsinki, Girlhood Studio, Sport Club Vantaa

- Developed a bilingual voice AI assistant that automates class inquiries and registrations (see Projects).
- Led brand strategy and end-to-end production of marketing materials, social media and video; drove audience engagement through targeted campaigns.

Communications & Youth Work (two summer roles)

Summers 2021 & 2022

City of Helsinki · Ruudin viestintätoimisto

- Produced digital content and events for youth initiatives; grew engagement through strategic outreach.
- Prepared interviews and background material; coordinated meetings with city officials.

PROJECTS & VOLUNTEER WORK

- **Finnish Industry 5G & AI Readiness Index** — consulting-style market-intelligence dashboard scoring Finnish industries on AI/5G readiness × market attractiveness (Statistics Finland open data → SQL star schema → Power BI report → AI executive brief); outputs a segment-prioritisation matrix.
- **Tutor AI Assistant** — production RAG customer-service agent (Next.js, OpenAI, Supabase) for a real business.
- **Voice AI Dance Studio Assistant** — bilingual (FI/EN) voice agent on Telegram: Whisper, GPT, n8n, Google Sheets.
- **Finland Mental Health Dashboard** — Python/Streamlit analysis pipeline on THL & Eurostat open data; Dockerized, CI on GitHub Actions.
- **Volunteer | SLUSH 2024-2025** — operations and guest experience at Europe's leading startup event.

SKILLS

Business & Strategy

Market analysis · analytics & reporting for decision-making · proposal & sales-enablement workflows · customer experience · Agile / Scrum

AI & Automation

OpenAI API · Claude Code · n8n · RAG · prompt engineering · AI workflow design

Data & Analytics

Python (Pandas, Streamlit) · SQL · data visualization · Power BI (report built — active project)

Development

REST APIs · Supabase / PostgreSQL · Next.js (basics) · Git / GitHub · Docker & CI

EDUCATION

ITBBA, Business Information Technology

Haaga-Helia UAS · 2023-2026 (graduating Dec 2026, Digital Services)

Psychology studies

University of Helsinki · 2023 →

IB Diploma

Ressu Upper Secondary School · 2020-2023
